

# EDiHTA

**The first European Digital HTA framework co-created by all stakeholders along the value chain**

EDiHTA will be the first flexible, inclusive, validated and ready-for-use European HTA framework allowing the assessment of different DHTs (e.g. telemedicine, mApps, AI) at different technology maturity levels, territorial levels (European, national, regional and local) and perspectives (e.g. payer, society, hospital).

## PROBLEM

The implementation of DHTs implies new methodological challenges to the standardisation of assessment criteria. As long as existing Health Technology Assessment methodologies remain not harmonised and interoperable at EU level, they are unable to capture the real added value of DHTs.

## OUR SOLUTION

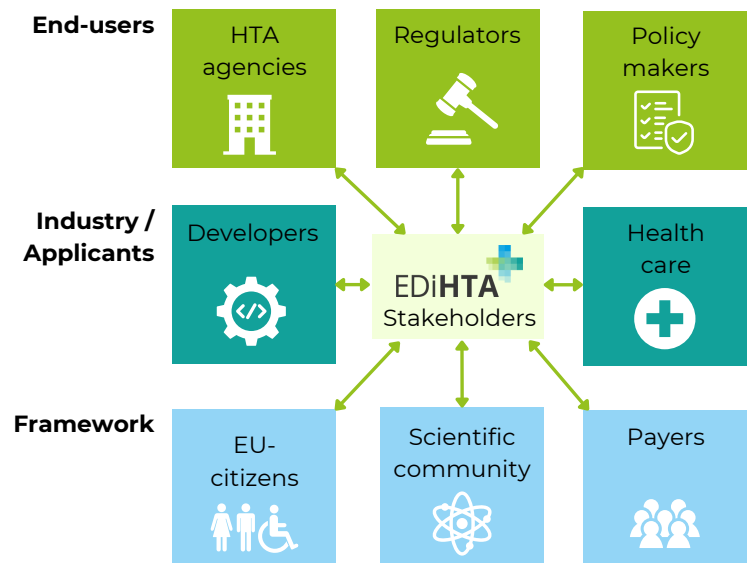

EDiHTA will provide an innovative, digital and flexible HTA framework for DHTs that integrates existing assessment domains and methods with new approaches to support decision-making at all levels, allowing for standardised and customised assessments based on the type and lifecycle stage of the DHT.

## EDiHTA STAKEHOLDERS

Stakeholder involvement and engagement are one of the main strategies that will underline the project across the full life cycle. We understand the vital importance of providing the EU life science ecosystem with a new and innovative framework — one that thoroughly integrates the diverse perspectives of users in DHTs. Our ambition is to create a ready-for-use HTA framework that incorporates perspectives from all stakeholders.

Funded by the European Union (GA no. 101136424). Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union the European Health or the Digital Executive Agency (HADEA). Neither the European Union nor the granting authority can be held responsible for them. The UK participant is supported by UKRI grant No 10106869 (National Institute for Health and Care Excellence). The Swiss participant is supported by the Swiss State Secretariat for Education, Research and Innovation (SERI).

Coordinated by the **Università Cattolica del Sacro Cuore**, under Professor Americo Cichchetti, EDiHTA brings together a multi-disciplinary consortium of 19 partners from 10 European countries with key expertise in HTA research, including 3 HTA agencies, 6 clinical partners as end-users of DHTs and a patient organisation, one NGO specialised in HTA, a global quality assurance and risk management company and notified body for MDR certification as well as the European Institute of Technology, the European Patients' Forum and the European Health Management Agency and Italian Ministry of Health.
